Lead Engineer and Architect with over 15 years of experience designing, building, and optimizing petabyte-scale, multi-cloud data platforms across GCP, AWS, and Azure. Specialized in cutting-edge Generative AI and Agentic AI frameworks, including LLMops strategy and GenAI-powered BI solutions. Deep expertise in the modern data stack (Spark, Python, BigQuery, dbt, Kubernetes, Terraform) to deliver high-performance, real-time data architectures.

EXPERIENCE

Lead Engineer @ Cloudflare

Nov 2022 — Present

- Spearheaded enterprise-wide GenAI strategy with LLM pipelines using Kimi and Llama.
- Architected Chat & Personal Intelligence layer into Apache Superset.
- Managed petabyte-scale processing across hybrid multi-cloud ecosystem.
- Engineered real-time APIs with <30s end-to-end latency.
- Designed Medallion Architecture with automated lineage tracking and dbt in CI/CD.

Tech: GCP, Python, Spark, BigQuery, dbt, Superset, Kimi, Llama, Kubernetes, Terraform

SDE / ML Engineer @ Amazon

Jul 2021 — Nov 2022

- Led migration of legacy on-prem workflows to AWS with 100% data fidelity.
- Designed scalable ingestion pipelines with Python/Spark on EMR.
- Architected three-layer Medallion Lakehouse, reducing query costs by 20%.
- Automated ML pipelines accelerating feature engineering by 30%.

Tech: AWS, Spark, Python, EMR, Airflow, Kinesis, S3, Glue, dbt

ML Engineer @ Walmart

Jan 2020 — Jul 2021

- Drove 12% improvement in ML model performance.
- Built forecasting models predicting inventory across 4,700+ stores.
- Leveraged BigQuery processing 50TB+ of raw data and integrated Snowflake for 65% query performance boost.

Tech: GCP, BigQuery, PySpark, Snowflake, dbt, XGBoost, FBProphet

Big Data Architect @ Revlon

Jun 2018 — Jan 2020

- Designed Snowflake target-state architecture, yielding 40% query latency reduction.
- Pioneered dbt for SQL transformations catching 95% data anomalies.
- Built real-time apps with Databricks and Spark Streaming; Applied PySpark NLP on 200k+ reviews.

Tech: Azure, Snowflake, Databricks, Spark Streaming, PySpark, dbt

Sr. Data Scientist @ Bloomingdale's

Jan 2018 — Jul 2018

- Built Image Recognition model with 90%+ prediction accuracy and recommendation engine increasing conversions 8%.

Tech: Azure, HDInsight, PySpark, Python, Keras, VGG16

Cloud Lead Data Engineer @ Boeing

Mar 2017 — Jan 2018

- Processed 400 msg/sec real-time aircraft data to DocumentDB; Led team of 6 migrating 10+ apps to Azure Cloud.

Tech: Azure, Kafka, Spark Streaming, Scala, Python, Java

- **CA Technologies (Lead Data Engineer):** Built data pipelines for market insights delivery to executives.
- **ASU Research (Sr. Data Scientist & Engineer):** Built Big Data genomics pipeline and optimized Tumor Simulator.
- **AAA Insurance (Sr. Data Engineer):** Executed petabyte-scale migration; Implemented Cassandra service layer.
- **Systel Comm. (Software Engineer):** Migrated MySQL to HDFS; Built Java & Spring MVC applications.

SKILLS & TECHNOLOGIES

AI & Machine Learning

GenAI, LLMOps, Kimi, Llama, Keras, VGG16, XGBoost, FBProphet, SARIMA, NLP

Cloud Platforms

GCP, AWS, Azure, BigQuery, EMR, Dataproc, Databricks, HDInsight

Data Engineering

Spark, dbt, Airflow, Kafka, Kinesis, Snowflake, Hive, Superset, Soda Core

Programming & Infra

Python, Scala, Java, SQL, PySpark, Shell, Kubernetes, Terraform, Docker, CI/CD

Databases

BigQuery, Snowflake, CosmosDB, DynamoDB, Cassandra, Elasticsearch, PostgreSQL
